

Essential Tools for Smoking Cessation

The Micro Direct breath carbon monoxide monitors and lung age monitors are ideal tools for any smoking cessation program.

The **MicroCO**, #MC02, at **\$1,195** and the **CO Check Pro**, #CO20 at **\$895** are the gold standard in CO breath testing providing an exact measurement of carbon monoxide and a %COHb along with colored light indicators.

Combining accuracy and simplicity at an economical price, the CO Check+, #CO10, at **\$695** displays an exact measurement of carbon monoxide and a %COHb without all the extras.

The simple and easy-to-use **PulmoLife Spirometer**, #PL10, at **\$195** and the **spiro✓ spirometer**, #MD02, at **\$175** offer a practical solution for screening adult smokers by offering an “estimated lung age” to show how smoking has effected their lungs.

In addition to the devices, Micro Direct offers disposable mouthpieces. The CO mouthpieces, **#3301** (bag of 100), are **\$17/bag**, the SafeBreath™ filtered CO mouthpieces, **#FM200** (box of 200), are **\$75/box**. The spirometer mouthpieces, w/one way valve, **#3395** (box of 200), are **\$80/box** or without a one-way valve, **#3314SB**(box of 200) or **#3314B5** (box of 500), are **\$35/box** and **\$75/box** respectively.
