

It's Important - Your office sees patients with indications for spirometry on a daily basis. Spirometry is the gold standard for the diagnosis and management of both asthma and COPD. The earlier you detect the disease; the easier you can deal with it.

It's Good Medicine - Your patients are correctly diagnosed and treated more accurately and conveniently in your office.

It's Easy - Unless the equipment is easy to use, it will not be fully utilized by your staff. All Micro Direct spirometers are menu driven via a large graphic display and the test takes less than five minutes to perform. The easy-to-read reports, quality checks and built-in interpretation assist with your diagnosis.

It's Good Business - Office spirometry is third party reimbursable with an average reimbursement of \$38 for a simple five minute non-invasive test. The average primary care physician tests ten patients per week and pays for their equipment in three months or less then generates over \$20,000 per year in additional revenue.

Why Micro Direct? - Only Micro Direct offers a complete line of automated spirometers designed to meet your needs. Each utilize inexpensive, readily available mouthpieces and meet all ATS/ERS standards. Micro Direct's spirometry experts will help you choose the right spirometer and then fully support your staff from proper testing techniques through billing questions; and all Micro Direct spirometers are backed by a 30-day money back guarantee.

SpiroSafe Filter
Order #3385
\$110/box of 100

MicroCheck
One-Way Mouthpiece
Order #3395
\$80/box of 200
