

1. The SpiroBank II Basic can be turned on or off by holding **this button**

there will be 3 screens that appear:
the first is the logo splash screen
and shows the date & time

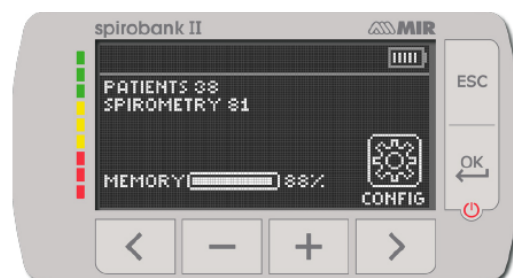

The second screen shows:

the number of patient files,
the number of spirometry tests,
the amount of free memory
and the battery symbol indicating
the amount of battery charge

It will also show you the configuration
icon that brings you to the
Configuration Menu

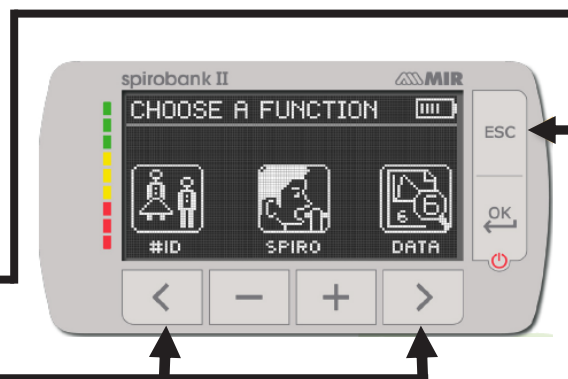

Pressing the right arrow
under this symbol will take you to the
Configuration Menu

The third screen is the Main Screen where you can choose a function.

You can also navigate the configuration
menu from the main screen pressing the
ESC button

Use the left & right arrow buttons to scroll up
and down through configuration menu.

Entering patient information

Press the left arrow
under the I.D. symbol

This screen appears:

There are two choices for entering patient information

Choose New by pressing the left arrow to
create a new patient

Choose Modify by pressing the right arrow to
edit an existing patient file.

Selecting New Patient: the insert patient data screen will appear

Use the minus and plus buttons to increase/decrease numbers in the number fields.
Once birthdate, height (inches or cm) and weight (lb or kg) have been entered, two choices will appear for gender. Press the minus to highlight male or press the plus to highlight female.

Then press the **OK button** to make your choice.
Next the ethnicity option will appear.
Use the left and right arrow to scroll up and down through the choices. Press the OK button to confirm your choice.

Now you will be back on the main screen

To Perform an FVC Test

Insert the flow turbine with the cardboard mouthpiece pointing out the same side the screen is on and twist it clockwise to lock.

Back on the main screen, press the minus sign under the spiro symbol

A new screen appears with spirometry test choices

(The POST choice will be grayed out until at least one Pre FVC test is done).
Press the button under the choice of test.

The next screen will have instructions about performing the test.
The patient may begin to perform the test at this screen.
The test will time out if not started in time.

Connect the device to the computer via the micro USB cable to charge it.

The screen will say '**external control**' and will remain on while connected.
